February 2016

Our Purpose: "To do what we say, when we say"

Happy New Year!!!

We hope you had a fantastic festive season and are ready to tackle 2016 and whatever it brings our way.

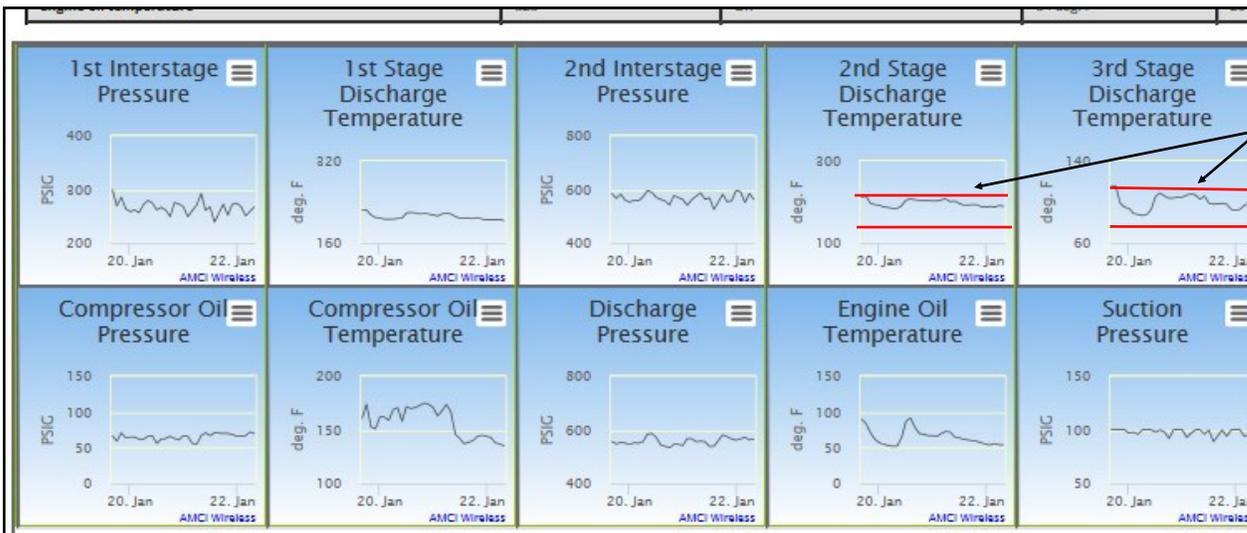

Let us start the new year by reinforcing that in 2016, AMCi Wireless continues our commitment to providing customers a premium product suite, with superior service at a reasonable price.

The market has undoubtedly experienced some low commodity prices in the last year and everyone is actively pursuing cost savings wherever possible. AMCi is cognizant of this and sees it as pertinent to offer our customers solutions that both increase efficiency and reduce cost.

One thing we have all learned over the past year is that we cannot control the commodity price. There are far too many factors at play, many of which are out of our sphere of influence. What we can control, however is the cost and efficiency of our operations. This can be achieved in many ways such as: reducing waste, increasing uptime of equipment, improving efficiency, optimizing maintenance intervals, amongst many, many others.

Imagine if you could predict failures in your equipment before they happened? Imagine the savings in downtime, broken equipment, time wasted in diagnosis, etc. Imagine if this information was brought to your attention automatically, without having to trawl through mountains of reports looking to identify issues. The savings, profitability and uptime would be significant. The good news is that you can!!

AMCi Wireless's new look SatAlarm®-Server offers functionality that provides the ability to identify trends which are of concern, enabling customers to address the issue prior to a failure occurring in some cases. An example of this is shown below.

Ability to prescribe "set points" to alarm when a breach occurs, allowing action to be taken as appropriate.

AMCi-Wireless will be attending several important shows in the coming months, the first being the 20th annual Gas Compressor Association (GCA) conference from Monday March 21—23, 2016 at the Moody Gardens Convention Center in Galveston, Texas. Attendees will see the latest technology in Gas Compression and have the chance to network with many industry contacts. AMCi will occupy Booths 312 and 314. For more information, check out the website at www.gascompressor.org

UPCOMING EVENTS

We look forward to serving you long into the future and as always, we are extremely grateful for your ongoing business.

The AMCi Wireless Team.
